The performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-800-762-7085 or visit www.cavanalhillfunds.com.

Certain fund expenses may have been waived or reimbursed. Had waivers and reimbursements not been in effect, the performance quoted would have been lower. Currently, contractual fee waivers are in effect from December 28, 2023 through December 31, 2024. Class A Shares are subject to a 1.00% Maximum Deferred Sales Charge (Load) on shares purchased without an initial sales charge and redeemed within 12 months of purchase. Performance data does not reflect the Maximum Deferred Sales Charge. If reflected, the load would reduce the performance quoted.

Morningstar Rankings[†]

Category: Options Trading

	Rank	Percentile
1 Year	258/318	84
3 Year	202/243	88

Rankings are for Institutional Class and are based on total return excluding sales charges, independently calculated and not combined to create an overall ranking. For periods not shown, Morningstar does not provide rankings based on synthetic performance.

Lipper Rankings*

Category: Lipper Options Arbitrage/Opt Strat Fds

	Rank	Percentile
1 Year	242/296	82
3 Years	188/206	91

Rankings are for Institutional Class and are based on average annual total returns, but do not consider sales charges. Rankings for other share classes will differ due to differences in expenses, fees, or sales charges.

†Morningstar (as of June 30, 2024)

Morningstar rankings are based on a fund's average annual total return relative to all funds in the same Morningstar category. Fund performance used within the rankings, reflects certain fee waivers, without which, returns and Morningstar rankings would have been lower. The highest (or most favorable) percentile rank is 1 and the lowest (or least favorable) percentile rank is 100.

*Lipper (as of June 30, 2024)

The Lipper ratings for **Preservation** reflect the funds' historical loss avoidance relative to other funds within the same asset class. Preservation ratings are relative measures, rather than absolute measures, and funds named Lipper Leaders for Preservation may still experience losses periodically; those losses may be larger for equity and mixed equity funds than for fixed income funds. The Lipper ratings are subject to change every month and are based on an equal weighted average of percentile ranks for the Expense metrics over three-, five-, and ten-year periods (if applicable). The highest 20% of funds in each peer group are named Lipper Leaders with a rating of 5, the next 20% receive a rating of 4, the middle 20% are rated 3, the next 20% are rated 2, and the lowest 20% are rated 1. The Cavanal Hill Hedged Income Fund, in Lipper Options Arbitrage/Opt Strat Fds classification received the following ratings for the three-, five-, ten-year periods, respectively, for the A Shares: Preservation: 5(12385 funds), for the Inst Shares: Preservation: 5(12385 funds), for the Inv Shares: Preservation: 5(12385 funds).

The Lipper Mutual Funds Average is an equally weighted average of the mutual funds within their respective Lipper classification, adjusted for reinvestment of capital gains distributions and income dividends. Lipper ratings are not intended to predict future results, and Lipper does not guarantee the accuracy of this information. More information is available at www.lipperweb.com. Important Disclosures

¹ The CBOE S&P 500 BuyWrite Index is designed to show the hypothetical performance of a portfolio that engages in a buy-write strategy using S&P 500 index call options. The S&P 500 Index is regarded as a gauge of the U.S. equities market, this index includes 500 leading companies in leading industries of the U.S. economy. Although the S&P 500 focuses on the large-cap segment of the market, with approximately 75% coverage of U.S. equities, it is also an ideal proxy for the total market. The Fund’s performance reflects the deduction of fees for these services, but does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investors cannot invest directly in an index.

² **Turnover Ratio** is a measure of trading activity for a rolling 12-month period represented by the percentage of a fund’s assets that have changed over the course of the time period.

Investment Risks

Equity securities (stocks) are more volatile and carry more risk than other forms of investments, including investments in below investment-grade fixed income securities. Fixed income securities are subject to interest rate risks. The principal value of a bond falls when interest rates rise and rise when interest rates fall. During periods of rising interest rates, the value of a bond investment is at greater risk than during periods of stable or falling rates. Mid- and small-cap companies may be more vulnerable to adverse business or economic developments. Although intended to limit or reduce investment risk, hedging strategies may also limit or reduce the potential for profit. There is no assurance that hedging strategies will be successful. Investing in derivative instruments involves risks that may be different from or greater than the risks associated with investing directly in securities or other traditional investments.

By writing covered call options, a fund will not benefit from any potential increases in the value of a fund asset above the exercise price, but will bear the risk of declines in the value of the asset. Writing call options may expose a fund to additional costs. Writing of covered call options are also subject to the risk that the counterparty to the transaction will not fulfill its obligations.

When the Fund purchases a put option on a security or index it may lose the entire premium paid if the underlying security or index does not decrease in value. The Fund is also exposed to default by the put writer who may be unwilling or unable to perform its contractual obligations to the Fund.

The fund’s investment in dividend-paying stocks could cause the fund to underperform similar funds that invest without consideration of a company’s track record of paying dividends. Stock of companies with a history of paying dividends may not participate in a broad market advance to the same degree as most other stocks, and a sharp rise in interest rates or economic downturn could cause a company to unexpectedly reduce or eliminate its dividend.

If positions held by the Fund were treated as “straddles” for federal income tax purposes, or a Fund’s risk of loss with respect to a position was otherwise diminished as set forth in Treasury Regulations, dividends on stocks that are a part of such positions would not constitute qualified dividend income subjects to such favorable income tax treatment or qualify for the dividends received deduction for corporate shareholders. In addition, generally, straddles are subject to certain rules that may affect the amount, character and timing of the Fund’s gains and losses with respect to straddle positions.
