The performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-800-762-7085 or visit www.cavalanhillfunds.com.

Certain fund expenses may have been waived or reimbursed. Had waivers and reimbursements not been in effect, the performance quoted would have been lower. Currently, contractual fee waivers are in effect from December 28, 2020 through December 31, 2021. Class A Shares are subject to a 1.00% Maximum Deferred Sales Charge (Load) on shares purchased without an initial sales charge and redeemed within 12 months of purchase. Performance data does not reflect the Maximum Deferred Sales Charge. If reflected, the load would reduce the performance quoted.

*Lipper (as of September 30, 2021)

The Lipper ratings for **Preservation** reflect the funds' historical loss avoidance relative to other funds within the same asset class. Preservation ratings are relative measures, rather than absolute measures, and funds named Lipper Leaders for Preservation may still experience losses periodically; those losses may be larger for equity and mixed equity funds than for fixed income funds. Lipper ratings for **Expense** identify a fund that has successfully managed to keep its expenses low relative to its peers and within its load structure. The Lipper ratings are subject to change every month and are based on an equal weighted average of percentile ranks for the Expense metrics over three-, five-, and ten-year periods (if applicable). The highest 20% of funds in each peer group are named Lipper Leaders with a rating of 5, the next 20% receive a rating of 4, the middle 20% are rated 3, the next 20% are rated 2, and the lowest 20% are rated 1. The Cavanal Hill Limited Duration Fund, in Lipper's Short Investment-Grade Debt Funds classification received the following ratings for the three-, five-, ten-year periods, respectively, for the A Shares: Preservation: 5(6193 funds), 5(5390 funds) and 5(3684 funds), for the Inst Shares: Preservation: 5(6193 funds), 5(5390 funds) and 5(3684 funds), for the Inv Shares: Preservation: 5(6193 funds), 5(5390 funds) and 5(3684 funds). The Fund received the following ratings for the three-, five-, and ten-year periods respectively, for the Inv Shares: Expense: 5(54 funds), 5(53 funds) and 5(36 funds).

The Lipper Mutual Funds Average is an equally weighted average of the mutual funds within their respective Lipper classification, adjusted for reinvestment of capital gains distributions and income dividends. Lipper ratings are not intended to predict future results, and Lipper does not guarantee the accuracy of this information. More information is available at www.lipperweb.com. Investment Risks

Fixed income securities are subject to interest rate risks. The principal value of a bond falls when interest rates rise and rise when interest rates fall. During periods of rising interest rates, the value of a bond investment is at greater risk than during periods of stable or falling rates. Short-term investment-grade bonds offer less risk and generally a lower rate of return than longer-term higher yielding bonds. Bond funds will tend to experience smaller fluctuations in value than stock funds. However, investors in any bond fund should anticipate fluctuations in price, especially for longer-term issues and in environments of changing interest rates.

†Morningstar (as of September 30, 2021)

Morningstar rankings are based on a fund's average annual total return relative to all funds in the same Morningstar category. Fund performance used within the rankings, reflects certain fee waivers, without which, returns and Morningstar rankings would have been lower. The highest (or most favorable) percentile rank is 1 and the lowest (or least favorable) percentile rank is 100.

Important Disclosures

¹ The 30-day SEC Yield is calculated by dividing the net investment income per share for the 30 days ended on the date of calculation by the offering price per share on that date. The figure is calculated according to a formula set by the SEC which requires use of a specific methodology for calculating dividends and interest earned, and expenses accrued, during the period. The standardized computation is designed to facilitate yield comparisons among different funds. Certain fund expenses may have been waived or reimbursed. Had waivers and reimbursements not been in effect, the SEC yields would have been 0.85% for A Shares, 0.86% for Investor Shares and 1.11% for Institutional Shares.

² This performance reflects the Fund's no-Load Investor class ("Investor Shares") for periods prior May 2, 2011 for the A Shares. The A Shares began presenting performance linked to the Investor Class in September of 2011. Unlike Institutional Shares, Investor Shares and A Shares bear a 12b-1 fee of 0.25%. Investor Shares and Institutional Shares are subject to a Shareholder Servicing Fee of 0.25%, whereas the Shareholder Servicing Fee for A Shares is 0.10%. As indicated in the table, A Shares are also subject to a sales charge (Load). Each of these differences is reflected in the performance information. Accordingly, had the A Shares of the Fund been offered for periods before May 2, 2011, the performance information would have been different as a result of differing annual operating expenses.

³ The ICE BofA Merrill Lynch 1-5 Year U.S. Corporate/Government Index is an index comprised of investment-grade government and corporate debt securities with maturities between one- and five-years. The index is unmanaged and does not reflect the deduction of the expenses associated with a mutual fund, such as investment management and fund accounting fees. The Fund's performance reflects the deduction of fees for these services, but does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investors cannot invest directly in an index.

⁴ **Turnover Ratio** is a measure of trading activity for a rolling 12-month period represented by the percentage of a fund's assets that have changed over the course of the time period. **Standard Deviation** is a statistical measure of the degree to which an individual value in a probability distribution tends to vary from the mean of the distribution. **Duration** measures bond price volatility by measuring the length of a bond.
