# Money Market Fund Commentary

## (Government Securities Money Market Fund & U.S. Treasury Fund)

### Why should investors consider investing in this Fund?

Despite the low interest rate levels, our money market funds provide professionally managed, liquid holding vehicles for short-term assets. Both are rated AAAM and Aaa-mf by Standard & Poor's and Moody's, respectively.

### Market Overview

Short-term credit markets remained anchored close to zero, reflecting the continuing impact of the COVID-19 pandemic, which is now more than a year old. The federal funds target range began and ended the period at 0.0% - 0.25%. Gross money market fund yields are at record lows as repurchase agreements and short-term government debt returns near zero continued to prompt fund sponsors to shore up fund yields.

### Positioning the Money Market Funds

*Portfolio composition is subject to change.*

The Federal Open Market Committee isn't expected to raise rates in the near future. We continue to use a blend of overnight repurchase agreements, floating-rate notes, short-term government debt, and other short-duration investments to capture what yield we can while staying true to the money market fund value proposition: safety, liquidity, and yield.

## DISCLOSURES
